

Smart & Simple Compressed Air Solutions with Outstanding Value

MSS 4 - 75 KW OIL-INJECTED SCREW COMPRESSORS

MLF 9 - 490 LINE FILTERS

MDS 10 - 260 REFRIGERANT DRYERS

MARK

User benefits

Reliability

- Mark brand
- Worldwide reputation over 50 years
- Reliable components
- Quiet and trouble-free operation
- Independent cooling fan
- Asymmetric profile rotors

Uncompromised Quality

- ISO 9001·ISO 14001 quality assurance
- OHSAS 18001 quality assurance
- World renowned screw element
- Industry proven electric motor
- Vertical separator tank

Simplicity

- Base mounted design
- Simple controller
- Belt drive
- Offers a simple plug-and-play solution
- Easy installation
- No special foundation needed

Easy Serviceability

- Easy access from front side
- Vertical cooler for easy cleaning
- Service and cleaning is a one person job
- Spin on spin on filters

Safety

- Emergency stop
- General alarm
- Fault shut down & alarm function
- Reverse rotation protection
- Maintenance alarm
- Motor overload protection

MARK History

Mark was established in 1970, and 4 years later, it started to sell piston compressor to foreign countries. The export business was proved to be very successful and promoted the rapid development of the company. By 1988, over 10,000 screw compressors had been in operation in Europe, and 100,000 worldwide.

Today, MARK has a global customer base, with local customer centers around the world.

MARK air compressors are tailored to the needs of the light industry and assembly production.

Every day we develop and manufacture new products that are meant to meet your demands not only today, but tomorrow as well.

| 5 Safety valve | | |

Spare parts distribution center: Belgium and Shanghai

Oil and water injected screw compressors plant: Belgium

Smart technical advantages

Asymmetric profile rotors mounted on high quality ball and roller bearings
High degree of sealing and the fine tolerances guarantees

- Greater yield
- High efficiency
- Long life & reliability
- Lasting performance

Simple user friendly controller with outstanding functions

- Color coded on/off buttons
- LCD display
- Service warnings
- Fault indication & re-set function
- Reverse rotation protection

Horizontal design bring high efficiency internally cooling

Fast service pre-filtration

- Smart slot design make quick service
- Easy clean with washing or air blowing

Mark compressors have an in-house designed belt drive system that offers

- Easy maintenance
- Simple installation
- User-friendly low noise operation
- The standard in the industry

Power supply: 380V & 400V. Please contact local sales team if any inquiry

Unit performance measured according to ISO1217. Annex C. latest edition and ISO 2151

Mark PM product features

Innovative technology advantages

1 Drivetrain system

- Innovation technology air cooled permanent magnet motor
- 1:1 directly drive to the airend design, enhance minimum transmission chemical loss
- IE4 and IE5 motor contribute to reduce energy consumption

2 Cooling system

- Design for operation at ambient temperature maximum 46°C
- Large aluminium material cooling capacity
- Professional exhausting flow bring high cooling efficiency

3 Inverter

- Strict selection based on the verification from market industry applications
- Smart inverter detect the compressor air needs in real time
- Quick response to the regulation system for perfect match every working peak

4 Controller

- 7 inches color display screen
- Touch control
- Simply and easy operation
- Friendly human interaction

5 After cooler

- Considerable aftercooler in standard to limit the moisture content in compressed air
- Protect piping system and end side equipments from rusty and possible failure caused by condensation

Unit performance measured according to ISO1217. Annex C. latest edition and ISO 2151

Mark TMDD features

1 station total solution advantage

1 Total solution installation

- Screw compressor, refrigerant dryer, 500L air receiver combination design for convenience the 1 station installation

2 Professional compressed air flow

- Compressed air from screw compressor through to air receiver for 1st step condensation removal, well reduce the burden on refrigerant dryer for ensuring compressed air dryness supply to end instrument

3 Compact layout

- Minimum foot-print design satisfy limit operation space installation

4 Simple operation

- Plug and play
- Friendly operation and quick service
- Quick technical support standby

Unit performance measured according to ISO1217. Annex C. latest edition and ISO 2151

User benefits

Reliability

- Mark brand
- Worldwide reputation over 45 years
- Reliable components
- Largest air dryer manufacturer
- Fault alarm function

Simplicity

- Compact design
- Simple technology
- Easy maintenance
- Simple controller
- Simple timer solenoid drain
- On-off switch

Uncompromised Quality

- ISO 9001· ISO 14001 quality assurance
- OHSAS 18001 quality assurance
- World renowned refrigerant compressor
- Industry proven fan motor
- In-house engineered condenser and evaporator
- International standard refrigeration gases

Easy Installation & Serviceability

- Inlet-outlet from the top
- Flexible placement allowed backside to the wall
- Easily serviceable
- Easy setting of drain intervals
- Easily removable side panels

MDS refrigeration air dryers

PDP indicator

The operation of the MDS dryer is monitored by an electronic controller indicating all relevant information:

Technical details:

- Status of the refrigerant dryer
- Status of the fan
- Dewpoint indication

Simple timer operated drain discharge

The refrigerant dryer range is equipped with a simple timer operated condensate drain discharge. Easy to set and adjust the condensate drain interval and drain operating period. Highest quality brand in Industry, reliable and efficient.

How does MDS dryer work?

Refrigerant circuit

The refrigerant circuit compresses and expands the refrigerant medium in a circular system in order to efficiently transfer heat from the wet compressed air to the atmosphere. The MDS dryer's refrigerant circuit is designed as a whole and only uses components of high and reliable quality, supplied by globally recognized manufacturers.

Air circuit

Wet compressed air flows directly through the MDS dryer's internal 3-in-1 heat exchanger, wherein the 3 key dryer functions are combined. Firstly the wet compressed air is cooled down to condensate the moisture, secondly this condensed moisture will be collected and drained out. Finally the dried compressed air is re-heated before it enters the factory's pipework.

The smart choice for high reliability

Components

1 Refrigerant compressor

Driven by an electric motor; cooled using refrigerant fluid and protected against thermal overload

2 HGB Valve

Bypass the extra capacity in low condition, sufficiently avoid ice block

3 3-in-1 aluminum heat exchanger

With integrated air-to-air heat exchanger, air to refrigerant evaporator; and water separator. High efficient heat transfer & high efficient water separate, low pressure drop

4 Refrigerant condenser

Air-cooled and with a large exchange surface for efficient thermal exchange

5 Motor-driven fan

For the condenser cooling air flow

6 Automatic discharge of condensate

- User adjustable
- Timer solenoid drain
- Reliable and time
- Proven design

7 On/Off switch

Reliable simple on/off switch to turn on and off the dryer

8 Control panel

Indicating all relevant information

Only original parts extend your compressor's lifetime, reduce maintenance costs and maximize efficiency

Correction factor for condition differing from the project K = AxBxC

Ambient temperature (A)					
Ambient Temperature (°C)	25	30	35	40	45
Multiplication Factor	1	0.91	0.81	0.72	0.62

Inlet temperature (B)								
Inlet Temperature (°C)	25	30	35	40	45	50	55	60
Multiplication Factor	1	1	1	0.82	0.69	0.58	0.45	0.41

Inlet pressure (C)									
Pressure (bar)	5	6	7	8	9	10	11	12	13
Multiplication Factor	0.9	0.97	1	1.03	1.06	1.08	1.10	1.12	1.13

- MDS design working condition: environment temperature 25°C, intake temperature 35°C
- The maximum pressure drop: less than 0.3 bar
- The new ow rate value can be obtained by dividing the current or real ow rate by the correction factor related to the real operation conditions.

Environmental friendly refrigerant gases

A key objective in the design of the MDS dryer was to deliver a product that offers performance, reliability and safety with the lowest possible environmental impact.

- Environmentally friendly thanks to the use of R134a and R410a gas
- No impact on the ozone layer
- R410a gas has exceptional properties:
 - Very low global warming potential (GWP)
 - Energy saving by use of rotary refrigerant compressor

Quality filtration for high reliability

The high quality air to meet the demand of downstream devices and processes:

- Clean air extends the lifetime of terminal air consumption devices, and bring higher air quality
- Protect the devices against rust by eliminating the impurities in the air
- The high-efficiency instruments extend the unit lifetime, reduce maintenance cost, and improve the production process
- The filter integrity is static, while the filter is removable, it brings easy installation and maintenance

MLF filter Fineness Classification

- Nominal pressure: 7bar
- Max. pressure: 16bar
- Nominal temperature: 40°C
- MLF is equipped with manual drain valve

CARE

Care is what service is all about: professional service by knowledgeable people, using high-quality original parts.

TRUST

Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

EFFICIENCY

Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference.
